

I benefit from XM radio. I pay for its services and especially like the traffic and weather broadcasts. Please reject the NAB's petition 04-160. This reminds of the similar situation in which on air broadcasters tried to limit cable and Satellite TV broadcasters from carrying local news channels. As an amateur radio operator, AB4EM, I have great respect for the FCC and hope you will make the correct decision to protect my rights to receive this information over XM radio.
